

REMOTELY POSSIBLE

To create safe learning environments on campus and to prepare students for the possibility of distance learning off-campus, the following measures are in place.

01

All students in grades 3 through 8 will have a Chromebook for classroom work.

02

Monday through Friday of the first week back students will be in their campus homes learning how to use the new technology.

03

Our goal is that teachers have the capability to teach both in the classroom and to the Health Center or Recovery Home simultaneously.

04

Use of technology means travel in the building and the resulting potential transmission of the virus is greatly reduced.

05

Technology will be used in various settings, even as classroom learning resumes, so that students are well-prepared for off-campus distance learning should that need to happen.

06

A plan is in place for distance learning should that situation arise.

If you have questions or concerns, please contact your child's Family Service Counselor.
